

SMPT Submission Checklist

Manuscript package

- done Main manuscript PDF compiled successfully: `main_smpt_submission.pdf`
- done Reference list expanded and cross-references resolved
- done Author, affiliation, corresponding-author email, funding, CRediT, and competing-interest statements included
- done **Acknowledgments** and **Data availability** written in submission-ready prose

Figures and tables

- done Main-text figures generated from repository-local evidence
- done Method overview figure included in the manuscript
- done Ablation and generalization figures included in the manuscript
- done Table layout tightened for `tab:scenario-overview` and `tab:export-correspondence`
- todo Final manual pass on residual table or line-break warnings if cleaner print layout is required

Graphical abstract and artwork

- done Separate graphical abstract prepared without generative AI
- done Exported as PDF, high-resolution PNG, and TIFF
- done Grayscale-legible flow layout and Arial font used
- todo Final visual check at journal upload resolution and thumbnail scale

Reproducibility and metadata

- done Manuscript states the confirmed model, environment, CPU, and GPU
- done New result outputs serialize a top-level `runtime_manifest`
- done Smoke result generated with `runtime_manifest`
- done Runtime-manifest tests added and passed
- todo Decide whether the archived canonical evidence should be rerun so every reported result also contains the new manifest

Editorial final pass

- todo Confirm whether a public repository or archive link will be disclosed at submission
- todo Replace the current data-availability wording if the journal requires a stricter template
- todo Add any late acknowledgments only if they are genuinely needed
- todo Complete final upload checks in the Elsevier submission portal
